PROFESSIONAL SUMMARY

Detail-oriented professional with a track record of data integrity, purchase order management, and cross-functional collaboration across both retail and industrial environments. Built and owned data systems end to end throughout, from a vendor master data system in industrial procurement to a self-initiated weekly performance report now used for management recaps at lululemon. Background is in electrical engineering, which built a habit of thinking in systems and treating every data point as something to verify, a discipline that transfers directly to owning accurate product and vendor data at scale. Strong retail math fluency and a keen eye for product and detail. Adaptable, highly organized, and motivated by building systems that make merchandising teams more effective.

CORE SKILLS

Visual Merchandising • Data Accuracy • Data Entry • Purchase Order Management • Master Data Management • Power BI • Retail Math • Sell-Through Analysis • Cross-Functional Collaboration • Written & Verbal Communication • Attention to Detail • Microsoft Office (Working Proficiency) • KPI Reporting & Analysis • Systems Thinking • Adaptability

PROFESSIONAL EXPERIENCE

lululemon | Visual Merchandiser — April 2024 – Present

Waterloo, ON

- Pioneered a weekly VM performance reporting system using Microsoft Excel and Power BI to connect sales data to visual merchandising strategy, increasing units per transaction (UPT) from 1 to 1.3 over three months.
- Surfaced under performing, high-potential products for increased visibility within a weekly performance report, lifting category revenue by 35%.
- Engineered a customized, store-specific report that replaced guesswork with data, cutting the visual merchandising team's decision-making time by 60%.
- Provided ongoing support to the management team by maintaining the report used to write weekly and monthly performance recaps.
- Cut back-of-house travel time by 40% by applying sell-through data to reorganize storage and internal material flow, assigning fastest-moving stock to a dedicated golden zone.
- Mastered shipment receiving and back-of-house operations voluntarily, then used the report to flag low sell-through items to the inventory team, creating an escalation path from floor data to store leadership and head office.
- Briefed the Regional Manager on the reporting structure and methodology, extending a store-level solution into a wider conversation.

lululemon | Educator — April 2024 – Present

Waterloo, ON

- Partnered daily with team members, building collaborative team relationships that ensured consistent execution across the guest experience.
- Applied an acute eye for product quality and technical fit to guide guest purchase decisions, reinforcing strong verbal communication in every interaction.

Petro Tajhiz Daria | Technical Engineer & Board Member — March 2021 – August 2023

Tehran Province, Iran

- Designed and maintained a vendor and part master data system covering 200+ instrumentation and electronic devices, structuring part numbers, supplier capability, compliance, and pricing into a single source of truth new team members could use without training.
- Owned the central purchase order tracking ledger end to end, numerically indexing 100+ client requests to maintain full traceability and data integrity across the order pipeline.
- Led direct supplier outreach and negotiation, cross-verifying equipment specifications and costs to protect project margins.
- Secured approved vendor qualification with 20+ petrochemical and steel producers, owning the full cycle from competitive tender through sourcing, costing, and delivery.

Niroo Research Institute | Research and Development Engineer — May 2019 – January 2023

Tehran Province, Iran

- Generated 100+ Requests for Proposal (RFPs) for a national infrastructure development plan, structuring technical scope and data requirements to source qualified suppliers at scale.
- Maintained and entered technical data for national power distribution network equipment, ensuring accuracy to support infrastructure planning decisions.
- Built cross-functional consensus among diverse corporate partners on high-stakes project parameters under strict budgetary constraints.

Asoo Design | Business Owner — December 2020 – Present

- Founded and operated an independent handmade jewelry brand, owning the full life-cycle from design through production and sales.
- Produced marketing content for a direct-to-consumer Instagram channel, lifting sales by 25%.
- Expanded into a multichannel distribution strategy through partnerships with physical art galleries, increasing overall revenue by 35% over one year.

EDUCATION

K. N. Toosi University of Technology - MEng, Power Electronics (2017–2020)

Iran University of Science and Technology - B.Sc., Electrical Power Engineering (2012–2017)
